

Developing Skin Contact Solutions for Foot Care

Feet bear the brunt of daily abuse from walking, jumping, running and more, making them naturally susceptible to many different types of problems.

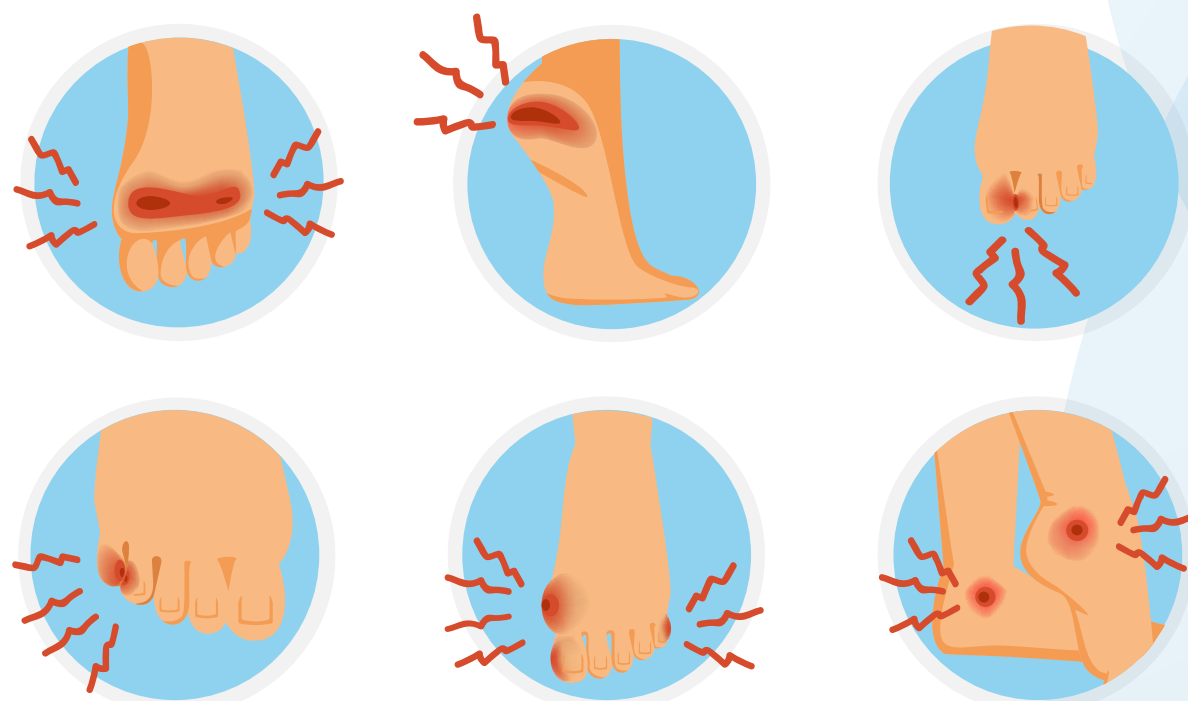

Did you know?

- Our feet are home to 52 bones—**25% of all bones in the human body**
- Women experience **four times** as many foot problems as men due to foot wear
- The average recommended number of steps per day is between **8,000 and 10,000**
- A healthy individual is estimated to cover more than **115,000 miles on foot in their lifetime**
- **Foot ailments** can be the first sign of more serious medical problems
- Conditions such as arthritis, diabetes, nerve and circulatory disorders, **show initial symptoms** on one's feet

Common Problems

Some of the most common foot problems include:

- Blisters
- Bunions
- Cracked heels
- Corns and calluses
- Athlete's foot
- Foot Infections
- Dry Skin

Hydrogel + Hydrocolloid Foot Care Bandages

Hydrogel and Hydrocolloid foot care bandages help to reduce discomfort from blisters, corns, calluses and bunions.

Benefits:

-  Provide cushioning and pain relief
-  Provide bacterial and viral barrier
-  Soothe and cool (Hydrogel)
-  Offer multi-day wear time

Foot Care Topical Solutions

Topical solutions help to manage foot care conditions like dry skin, athlete's foot and fungus, excess sweat and foot pain.

Benefits:

- Provide hydration to the feet
- Help to manage skin infections
- Help manage odor and sweat
- Help control minor foot pain
