

Managing Blemishes with **Hydrocolloid Adhesive Technology**

How Hydrocolloid Blemish Patches Work

Hydrocolloid Patch Benefits

- Reduces blemish size by absorbing secretions
- Helps reduce skin inflammation and redness
- Seals out water, bacteria and other external contaminants
- Helps avoid touching the affected area
- Can be worn day and night

Scapa Healthcare's highly qualified R&D team can work with you to develop custom skin-contact adhesive solutions to fit your market needs.
