

Treating Mild Acne with Topical Products

Did You Know?

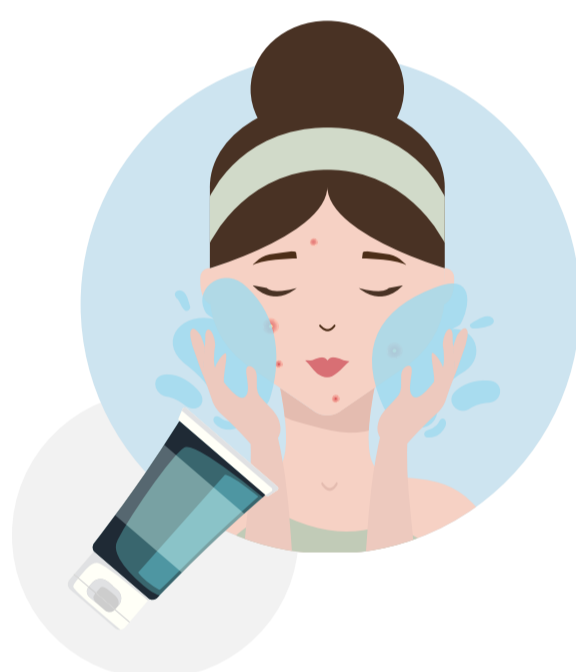

- Acne is a skin disease that affects approximately 633 million people globally
- It is the eighth most common disease worldwide
- It can be treated with over-the-counter topical solutions

Topical Solutions for Acne Treatment

EXFOLIANTS

CLEANSERS

CREAMS & SERUMS

Common active ingredients for effective topical acne treatments include benzoyl peroxide, salicylic acid and azelaic acid, used individually or in combination.

Benefits of Active Ingredients in Topical Solutions

- Benzoyl peroxide kills bacteria that infects pores
- Salicylic acid opens pores and encourages new skin cells to grow
- Azelaic acid kills acne-causing bacteria and decreases production of keratin, a natural substance that can lead to the development of acne

When developing topicals to help treat mild acne, it's important to choose a formulation partner that understands the science and ingredients to incorporate and create products that are both safe and effective for consumers.
