

## Scapa Nutri-T Blend

### Intensive Skin Protectant

**Scapa Nutri-T Blend Intensive Skin Protectant forms an invisible shield to replenish the outer layers of the skin while internally adding and holding in moisture to treat dry, damaged skin.**

- Helps restore skin's natural protective barrier
- Invisible shield protects, nourishes and renews
- Enhanced with vitamins and minerals
- Active ingredient: Dimethicone 2%

Our custom portfolio of topical wound care and skin care products allow us to deliver unique turn-key solutions to our partners.

### Maximum Skin Nourishment

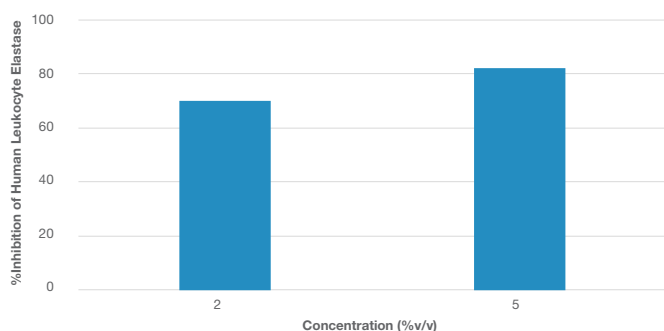

Nutri-T is a proprietary blend of moisturizers, antioxidants and skin repair actives extracted from carefully harvested, micro-filtered aphanizomenon flos-aqua (AFA), otherwise known as blue-green algae.

The algae is harvested from Klamath Lake in Oregon which is well-known for its unique ecosystem. The lake is fed by rainfall which passes through mineral-rich volcanic soil to create one of the most nutrient rich areas on the planet.

The algae is processed into a bioavailable, stable and homogenous product resulting in an active ingredient with superior bioavailability for maximum skin nourishing performance.

### Clinical Data

#### Protection of Extracellular Matrix

Inhibiting inflammatory trauma, such as UV exposure, Nutri-T Blend helps protect collagen and elastin, two of the most important structural components of the skin. The blend at 2% inhibits more than 70% of damage caused by elastase proteolytic activity.

### Nutrient Rich Formulation

#### Dimethicone 2%

- Skin protectant
- Helps temporarily protect and relieve chapped or cracked skin

#### Zinc

- Assists with the production of Collagen

#### Collagen & Elastin

- Marine derived proteins help skin remain supple and elastic

#### Blue-Green Algae Extract

- Blend of vitamins, minerals, eight essential amino acids, fatty acids and protein
- Naturally occurring combination of moisturizers, antioxidants, skin repair actives
- Beta-carotene neutralizes free radicals, acts as an antioxidant and vitamin A precursor
- B Vitamins control skin discoloration and provide anti-inflammatory properties
- Certified organic
