Our Markets

We offer a broad range of technologies and capabilities for wound dressings, ostomy accessories and topical products.

We offer a full range of skin fixation and topical skin care solutions for personal care and health & beauty applications.

We develop customized fixation solutions for diagnostics and continuous monitoring of clinical wearable devices.

Comprehensive set of
turn-key solutions to help our
customers win in the marketplace.

Technologies

Core Technologies

In-depth expertise in medical adhesives, advanced materials and topical products.

- **Scapa Soft-Pro® Adhesives**
- **Bioflex® Materials**
- **Skin Care Topical Products**

MEDIFIX Solutions™

Customized clinical wearable medical device fixation solutions for diagnostics and continuous monitoring.

Market Ready Solutions

Advanced Wound Care

Hydrogel and hydrocolloid dressings, and topical skin care solutions.

Consumer Wellness

Hydrogel and hydrocolloid bandages and topical solutions for personal care and health & beauty.

Ostomy Accessories

Hydrocolloid fixation solutions and skin care ostomy management products.

Device Fixation

Medical grade adhesive rollstock for conversion into medical devices.

Capabilities

Custom Formulation & Mixing

Extensive expertise in adhesive and topical skin care product formulations.

Adhesive Coating & Slitting

Variety of coating capabilities and techniques to support customer requirements.

Converting & Assembling

Fully integrated solutions for high precision cutting, conversion, perforation and assembly of simple to complex medical devices.

Liquids & Powders Filling

Rapid filling of liquids, creams and powders into bottles, tubes and jars for wound care, ostomy and consumer products.

Printing

State-of-the-art design and printing capabilities for labels, product and retail packaging.

Packaging

Fully automated packaging capabilities for efficient customized solutions.

Services

Research & Development

Dedicated research team with expertise in development of wound care, consumer products and medical device fixation.

Regulatory Affairs

Our experts offer full support from submission to clearance and post market surveillance.

Project Management

Highly qualified project managers and engineers take projects from conception to commercialization.

Product & Graphic Design

In-house design expertise and broad range of adhesives and performance materials to create innovative medical devices.

Laboratory

R&D labs offer custom formulation, rapid prototyping and microbiology, analytical and stability testing.

Sterilization

In-house gamma sterilization and partnered sterilization validation process for EtO and E-Beam.

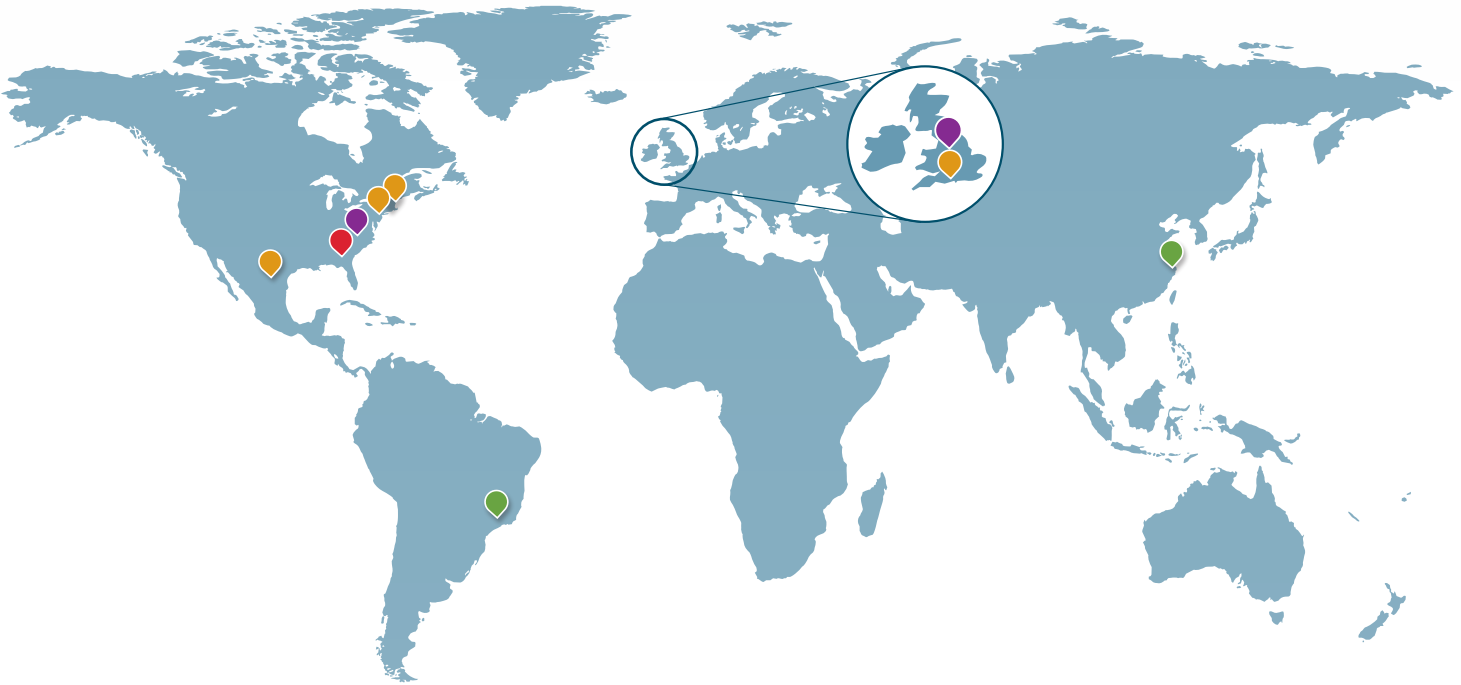

Logistics Solutions

Full range of end-to-end logistics services for inventory, distribution, and customer care management.

Global Footprint

With development and manufacturing facilities throughout North America and Europe, we can offer single source, dual supply to our partners.

Our facilities are ISO-certified and FDA registered with environmentally controlled rooms for full-scale production of finished goods.
